

CHERIE K. BERRY
COMMISSIONER

JONATHAN R. BROOKS
BUREAU CHIEF
ELEVATOR AND AMUSEMENT DEVICE BUREAU

January 31, 2008

The North Carolina Amusement Device Bureau has provided all companies operating amusement devices in our state with a list of inspection guides that can be referred to prior to the inspector arriving at the site for the requested inspection. These guides are ride-specific and more will be available to you in the near future.

The advantages of using these guides are to aid in the training of your operators; to ensure the devices are properly erected; and can reduce complacency by those charged with the erection of the devices. Please feel free to make copies of the inspection guides for the devices you currently operate. Train your operators as to how to use them. Adopting this inspection tool will reduce the number of violations identified by the local inspectors and help you to get your rides open on time.

Please take some time and review this information. We feel it will help your company and help you identify potential problems before they happen.

Respectfully,

Thomas Chambers
Assistant Bureau Chief
